DEGREE ENHANCEMENTS

CONCENTRATIONS

Students may choose to add a Concentration in **Energy Technologies**, **Nanotechnology** or **Technology Innovation**. Students completing a Minor in Mechanical Engineering may choose to add a concentration in **Aerospace Engineering**. A concentration requires 4 courses which can usually be used to satisfy courses within the major. Hence, a concentration can usually be completed without additional coursework. More information on concentrations and the specific requirements for each can be found at <http://www.bu.edu/eng/academics/programs/concentrations/>.

MINORS

Students may choose to add a minor in any one of the other degree programs or divisions (**Materials Science & Engineering** or **Systems Engineering**) within the College of Engineering. A minor consists of 5 courses, 2 of which may also be used to satisfy requirements for the major. Completing a Minor will add a minimum of 12 credits to the total for the degree. More information on minors and the specific requirements for each can at <http://www.bu.edu/eng/academics/programs/minors/>. Students may also pursue minors in other Colleges at Boston University. For more information, please contact the College of the minor.

DOUBLE MAJORS

Students may earn two engineering BS degrees. Double majors require a minimum of 168 credits and students must fulfill the requirements for each of the degree programs.

See <http://www.bu.edu/eng/academics/special-programs/> for more details.

OTHER WAYS TO ENHANCE YOUR DEGREE

Students have several additional options available to them including **study abroad**, **research**, and **co-op/internship** opportunities. For more information on these programs, please visit the College of Engineering Undergraduate website: <http://www.bu.edu/eng/academics/>.
